Welcome, Rupesh!

Wor

Take a tutorial

Step through implementing a Data fabric use case in a sample project.

Quick start

Create data pipelines with DataStage

Build customer profiles with IBM Match 360 with Watson

Catalog and govern data with Watson Knowledge Catalog

Build and manage ML models

with Watson Studio

Work within a project to build models. Customize how you work by choosing from notebooks, graphical canvases, and no-code tools.

Get started

Sample project

Open a sample project with prebuilt Watson Studio assets.

New project

Next

Create a project and then add your own data to get started.
